

Help document of mm-forms

List of mm-forms

The screenshot shows the 'MM Forms' interface. At the top left, there is a 'New form' button (1). Below it is a table with columns: Form Name, Form Tag, View, Edit, Export, Download, and Delete. The first row shows 'Contact form 1 (1 New / 1 Total)' (2) with a tag '[form 1 "Contact form 1"]'. The 'View' (3), 'Edit' (4), 'Export' (5), and 'Delete' (6) buttons are visible for this form. Below the table, there is a text input field with 'Uninstall' (7) and a 'Remove MM Forms' button (7). A note below the input field states: 'Type Uninstall if you want to completely remove MM Forms plugin. This includes deleting all your data and database tables.'

1. You able to create new form from here
2. Able to see number of total record entered, here new indicate newly entered record and total indicate , total number of records are there for contact form 1
3. View submitted data of contact form 1
4. Edit form contact form 1
5. Export to submitted data to CSV file
6. Delete the contact form 1

MM Forms settings

The screenshot shows the 'MM Forms' settings page. At the top, there is a navigation bar with tabs: FORM OPTIONS (1), MAIL OPTIONS, EXPORT OPTIONS, MORE SETTING, and FORM DATA TEMPLATE. Below the navigation bar, there is a 'Form Name' field with 'Registration Form' (2). Underneath, there is a 'Form' section with a text area containing HTML code for form fields: 'Your Name (required)', 'Your Email (required)', 'Subject', and 'Your Message'. A large bracket (3) groups these fields. Below the text area, there is an 'Add form field' dropdown (4). Under the 'Form Handling' section, there are radio buttons for 'Save to Database and Mail', 'Mail only', and 'Database only'. A large bracket (5) groups these options. Below the 'Mail format' section, there is a checkbox for 'Send mails in html' (6). At the bottom right, there is a 'Save' button.

1. Number option available for customization of mm-form
2. Name of newly created mm-form
3. Text area of mm-form ,where we able to write code customization of mm-form
4. From here, you able to add new control to mm-form
5. option for form handling, like you want save submitted data to database, sent to mail or both
6. Option to set mail format

Enable RSS Feed? 1
NOTE: Here is your rss link for the rss subscription
http://localhost/wordpress/?action=rss&form_id=1

Optional Setting

Maximum Number of Submissions : 2

Form available from date : 3 (yyyy-mm-dd)

Form available to date : 4 (yyyy-mm-dd)

Show Form available error message 5

Select User to display Form : 6
 (Hold Cntl key for multiple selection)

Redirect to this URL on success : 7

Redirect to this URL on failure : 8

Save

1. Option to set RSS Feed enable for mm-form. if you want to show submitted data as RSS Feed, below you find rss link for RSS Feed
2. option to set number of user submission, like for e.g if you set it 100 than, for this form it will allow only 100 submission only, after reach to 100 it gives message to “You reached your maximum limit”, so that’s way you able to control over number of submission of record for mm-form
3. option to set form available for particular range of date, like if you want to show form for 10 days starting from 10th july 2009 than set it to 10th july 2009 to 20th july 2009, so form will automatically start to display in front end from 10th july 2009 and its become hide from 20th july 2009. this way you able to control over form display to user.
4. option to set last date for display form
5. option to show message to user, for e.g if you don’t want to show any message for above 2 option like “You reached your maximum limit” or “form is not available” (default message), if it is selected than message will display to user, else it will not display.
6. option available to allow number of user able to see this form, here list box display all available user of wordpress and need select number of user you want to allow see the mm-form, if you not select any user from list ,than by default form available to all.
7. Option to set redirects url when form is successfully submitted, like for e.g if you want to redirect to www.xyz.com on successfully submission of data.
8. Option to set redirects url when form is not successfully submitted, like for e.g if you want to redirect to www.abc.com on unsuccessfully submission of data.
