Arlington, Va.

Economic inequality has become the talk of the nation, and the President has called for raising the minimum wage. This is not just a political issue - it's a moral imperative.

- Will raising the minimum wage enhance productivity and lower turnover, or cause unemployment and increase costs to consumers?
- Can businesses and Congress be persuaded to promote an increase in the minimum wage?
- How can "we the people" get Congress to regulate campaign finance contributions?
- How does the escalating cost to run for public office drive the income divide especially in light of recent Supreme Court decisions?
