Friend of the marchers, Michael Dowd, will discuss that: *Science and religion are not enemies; indeed, they must work together if humanity is to survive the 21st century. Given our impact on Earth's climate, the seas, and other species, humanity is about to experience what could be called The Great Reckoning. The good news is that this will also be The Great Homecoming: the prodigal species coming home to Reality. This presentation will focus on 6 points of agreement held in common by tens of millions of religious and non-religious people across the globe – and how to stay inspired in the face of changing climate and other large-scale challenges.* See Michael Dowd at [Speaking Engagements of Connie Barlow and Michael Dowd](#)
