VOLUNTEER at the College Park Office

Over the next decade, Prince George's County will spend 1 billion dollars (and Montgomery will spend 500 million) on local projects to reduce storm water flooding, filter *polluted* runoff, and green and revitalize our neighborhoods.

Citizens will learn about this HUGE opportunity to clean up our rivers and streams, restore forests and habitat, green our infrastructure and revitalize our communities and the part we can play to make sure these funds are properly used

If we wisely invest these storm water upgrade funds which are once-in-a-generation investments we can make a huge difference in protecting our environment – and respond to the increased flooding that we are seeing as the climate changes.

Help get the word out! Phone banking: Tues 11/11 - Thurs 11/3 - Tues 11/18 -Thur 11/20/14
